Subject: Microsoft Settlement

I am shocked that the government has brought this case against Microsoft. Microsoft is an innovative company that does a lot for its consumers. It's amazing that a small business can be successful with the tools Microsoft has developed. This case against Microsoft needs to be dropped. It's harming consumers and our economy to continue such a fight against a company that has done so much for the consumers and America! Please drop this case and move on. Settlement is needed to help the economy to move forward. I am so disappointed in the 9 states that are continuing the fight against Microsoft. They are obviously not listening to the American people since most of us do not want this to continue since Microsoft has done so much to help improve our lives. It's so obvious that the 9 states are being pushed to continue to fight Microsoft just for money and their power-hungry competitors that have not been able to develop products as well as Microsoft. As a consumer I choose which products I want to use. It's not forced upon me! Therefore I'm not sure how I'm being harmed. I choose what I want to use and I will continue to choose Microsoft. Please move forward and let things continue the way they are.
